

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

Spread Tawhīd & Sunnah and Do Not Become Weary and Bored

Shaykh Sulaymān Ar-Ruhaylī (Allāh preserve him)

I encourage the students of knowledge to benefit from these beneficial means (of communication) which connect them to their brothers from the scholars and the students of knowledge.

There is no doubt that whenever knowledge is propagated and spread, weak Fatāwa (religious verdicts) and innovations are repressed, the Sunan become manifest and goodness appears.

And this is precisely what we observed when there was more of such activity and when the Fatāwa of the senior scholars were being spread; it led to the appearance and manifestation of the Sunnah across the globe, goodness appeared and so did worship upon the way of the Prophet (ﷺ). However, when the (former) affair started to decline, so did the latter.

So my advice to the brothers is that they attach importance to knowledge, knowledge, knowledge.

And spread Tawhīd and the Sunnah and do not become weary and bored. Spread Tawhīd and the Sunnah and do not become weary and bored. And do not let the speech of some cause you to leave this goodness of propagating Tawhīd and the Sunnah.

Likewise, spread the virtues of Ahlus-Sunnah and defend the honour of the scholars of Ahlus-Sunnah.

I ask Allāh, the Mighty and Majestic, to guide me and all of you to what He loves and is pleased with. [I also ask Him] to increase this goodness and to bring coolness to our eyes by way of the Muslims learning and recognising the rights of their Lord and how to improve and perfect their worship. Likewise, I ask my Lord, the Sublime and Exalted, to remove this distress, to have mercy upon this Ummah, to protect us all, to grant us all well-being and to pardon us all.

And this is what was possible for me [on this occasion].

Allāh is the Most High and He knows best. May the Ṣalāh and Salām of Allāh be upon our Prophet.
